

Atticus GALLERY

ATTICUS GALLERY

All products are designed by Paco Camús

Atticus Gallery.

This project starts thanks to the initiative of the collector and businessman Rafael Pons Valle who, with his enthusiasm and strength, has enabled this project to see the light.

Driven by the legacy of some of the most emblematic pieces of the designer Paco Camus, and thanks to the contribution of new designs, Atticus Gallery is at the forefront of companies that are committed to originality and excellence. Its mission is to offer extraordinary and unique products, based on constant experimentation and the application of the most rigorous quality criteria.

Atticus Gallery combines technology and craftsmanship to produce unique designs, immune to fashion and ready to conquer the hearts of lovers of beauty.

Paco Camús.

Old-school graphic designer, an illustrator, interior designer experienced in multiple projects, sculptor, collage artist. Paco Camus has always liked to play with the different tools of creativity. His professional career says he is more of a designer than an artist, but sometimes his designs persist in saying that he is more an artist than a designer. The truth is that furniture design, with a significative sculptural component, has been his main professional activity. Paco Camus leads a life dedicated to the search for beauty, as we can deduce from his own words.

"...I have always looked for that intangible magic that emanates from certain shapes and volumes. In that searching process I have never been able to find infallible theorems, not even plausible theories. But the magic is there, it exists, there is no doubt, therefore, although it cannot be explained, it can be searched. To that process of exploration I have dedicated my life. I don't have a formula, but I do have the knowledge and experience of a hunter. I know where it is hiding, I know how to catch it, and that's enough for me".

Company.

Atticus Estudio is a company of Spanish origin specialized in designing, constructing, reforming and equipping hotels. Our services include multiple specialities, but all of them are ruled by the same criteria of quality, efficiency and excellence. We have been executing projects in Europe and Asia for many years under various brand names and now we have begun to introduce ourselves in the Caribbean with a unique name, Atticus Estudio, which encompasses all our services. The objective of the company is to offer the best integral solutions for the hotel, tourism and leisure sectors.

Interior Design.

Interior design is undoubtedly one of our strengths, we can collaborate with our customers to make their dream hotel come true, providing solutions that enrich the project. Our condition as furniture manufacturers gives us a special adaptability and agility when carrying out projects. No matter the style or material, we have the right professionals and facilities to produce any type of piece.

Architecture & Construction

At Atticus Estudio we are always open and receptive to the latest international trends. Our creative department is constantly looking for the most innovative architectural proposals, because we like to explore new concepts applied to the world of hospitality and above all, we are interested in new ideas that bring freshness and modernity.

Our extensive experience in Europe allows us to offer an unbeatable quality in the execution of projects. The control and supervision of all the specialists and professionals involved in a work is one of our obsessions, as well as the imaginative and demanding selection of materials to be used in each phase of the project.

The logo for Atticus Estudio features the word "Atticus" in a large, elegant, black script font. Above the final 's' of "Atticus", the word "ESTUDIO" is written in a smaller, black, uppercase sans-serif font.
